Note: Refer to July for general planting tips that are useful throughout the year.
ZONE MAP

JANUARY 2007

JANUARY 2008

JANUARY 2009

Photo by Kent Kammermeyer

Recommended Shrubs and Trees:

Sawtooth Oak
Apple
Crabapple
Persimmon
Wild Plum
Dogwood

Hawthorne
Honeylcous
Honeysuckle
Grapes
American Chestnut
Wild Pear

NOTES
Plant cool season food plots for deer, turkey, rabbits, and other wildlife:
1. Rackmaster Clover Trio (10)
2. A mixture of red clover (10), arrowleaf clover (10), oats (50)
3. A mixture of Durana Clover (5), red clover (5), oats (50)

Wild Game Plot Planting Tips continued from November
9. Exclusion cages placed in the food plots that keep deer from grazing will provide you with valuable information on how productive the varieties are and how much forage is being grazed.

These simple tips along with specific information on seeding rates and times should give you the basics to grow abundant, year round food for your wild game. Growing food plots is an economical and legal way to produce larger, healthier animals and increase your hunting success or wildlife sightings. Planting food plots for wild game is legal in most areas of the United States if you follow normal agricultural practices. Contact your local Cooperative Extension Service Office and State Game Department for specific information.
DECEMBER CHECKLIST

- Plant trees and shrubs for deer and turkey
- Erect and fill bird feeders

For Zone Map see inside back cover.

1. Plant legumes for quail:
   1. Bicolor lespedeza (15)
   2. Kobe lespedeza (30)
   3. Kobe (20), with partridge peas (5)
   4. Bicolor (10), with partridge peas (5)

4. A mixture of arrowleaf clover (20), oats (50)
5. A mixture of Durana Clover (5) and Wintergrazer 70 Rye (60)
6. Rackmaster Deluxe (100)
7. Rackmaster Elite (50)
8. Pennington - Buckmasters Ultimate (8)
9. Pennington - Buckmasters Feeding Frenzy (50)

Fertilize:
Use Pennington’s Wildlife Food Plot Fertilizer (400)

All numbers in parentheses are lbs./acre broadcast.
Wild Game Plot Planting Tips continued from July

5. Avoid droughty sites such as deep sands or shallow rocky soils. Southwest-facing sites are hotter in the summer and tend to dry out faster than bottom land. Morning sun is better than afternoon sun for summer game food plots. The reverse is generally true in the winter.

6. A minimum of 50% sunshine is essential for a healthy, productive food plot.

7. Grow something in your food plots year round to provide adequate nutrition for wildlife. Plowing strips and planting into existing plots is an excellent way to extend the productivity of the plot and hold wild game all year long.

8. You need to keep a record of each plot which can include planting and fertilizer information and number of animals observed or harvested.

Wild Game Plot Planting Tips continued in December
Use Pennington Wild Bird Feed for a complete mixture of grains for a healthy diet

Use Pennington’s Wildlife Food Plot Fertilizer (400)
1. Japanese honeysuckle
2. Oak trees
3. Mature fruit trees

Minerals/Salt:
Use Rackmaster Deer Mineral

Select a clay soil area near a food plot or other food source. Clear leaf litter and dig a shallow hole. Mix 50 lbs. of mineral/salt mixture with an equal amount of soil. Recharge as needed.

All numbers in parentheses are lbs./acre broadcast
Cool season food plots for deer and turkey: (see August and September)
1. Rackmaster Elite (50)
2. Rackmaster Deluxe Fall Deer Mixture (100)
3. Pennington Deer & Wildlife (100)
4. Pennington - Buckmasters Ultimate (8)
5. Pennington - Buckmasters Feeding Frenzy (50)
6. A mixture of Durana Clover (5), red clover (10), rye (30), wheat (30) - in zones A, B, C, D, F
7. A mixture of Durana Clover (5) and perennial ryegrass (25) - in zones C, D, F
8. A mixture of crimson clover (15), hairy vetch (15), wheat (60) - in zones A, B
9. A mixture of arrowleaf clover (15) or crimson clover (15), oats or rye (30), wheat (30) - in zones A, B
10. Birdsfoot trefoil (20) - in zones C, D, F
11. Rape (2), kale (2), turnip (2)

All numbers in parentheses are lbs./acre broadcast
**OCTOBER CHECKLIST**

- **Plant cool season food plots for deer and turkey** (see Aug. & Sept.)
- **Fertilize perennial food plots for deer and turkey** (if not done in September)
- **Fertilize Japanese honeysuckle** (if not done in September)

---

**Fertilize perennial food plots:**
1. For newly planted clover mixes use 300 lbs./acre
   Pennington Wildlife Food Plot Fertilizer 8-12-12
2. For grasses use Pennington Wildlife Food Plot Fertilizer 8-12-12 (400)
3. Use soil test recommendations if available

*(continued from above)*

9. Grain sorghum (5), with lab lab (10)
10. Chufa (40-50)

**Warm season for quail:**
1. Wingmaster Quail Mix (40)
2. Browntop millet (40)
3. Egyptian wheat (10)
4. Grain sorghum (10)
5. Corn (15)
6. Soybeans (60)
7. Grain sorghum (5), with iron clay peas (40)
8. Iron clay peas (60)
9. Oklahoma Game Bird Peas (40)

*All numbers in parentheses are lbs./acre broadcast.*
Plant warm season food plots for deer and turkey (see April)  
Plant warm season food plots for quail or turkey (see April)  
Plant dove fields  
Mow perennial food plots for weed control if needed

**Plant dove fields:**
1. Wingmaster Dove Mix (40)  
2. Browntop millet (40)  
3. Proso millet (40)  
4. Grain sorghum (10), (yellow or white endosperm)  
5. Peredovik sunflower (40-50)  
6. Striped sunflower (40)  
7. Sesame (6)  
8. Sesbania (25)

2. Rackmaster Deluxe Fall Deer Mixture (100)  
3. Pennington Deer & Wildlife (100)  
4. Pennington - Buckmasters Ultimate (8)  
5. Pennington - Buckmasters Feeding Frenzy (50)  
6. Rackmaster Choice Chicory (3)  
7. A mixture of Durana Clover (5), red clover (10), rye (30), wheat (30) - in zones A, B, C, D, F  
8. A mixture of Durana Clover (5) and perennial rye grass (25) - in zones C, D, F  
9. A mixture of arrowleaf clover (15) or crimson clover (15), oats or rye (30), wheat (30) - in zones A, B  
10. Birdsfoot trefoil (20) - in zones C, D, F  
11. Rape (2), kale (2), turnip (2)

All numbers in parentheses are lbs./acre broadcast
SEPTEMBER CHECKLIST

- Plant cool season food plots for deer and turkey (see August)
- Fertilize and lime perennial food plots for deer and turkey (see October)
- Fertilize Japanese honeysuckle
- Mow or harvest dove fields for later opening days in the deep South

Fertilize:
Japanese honeysuckle with Pennington Wildlife Food Plot Fertilizer 8-12-12 (400)

Cool season food plots for deer and turkey:
(see August and October)
1. Rackmaster Elite (50)

(continued from above)

Mowing:
1. When mowing in spring, start in the middle of the plot and work out to the edges to preserve turkey nests and insects
2. Mow perennial clover mixes for weed control
3. Mow perennial grasses to promote regrowth and provide for turkey brood rearing

Fertilize:
Fertilize warm season grasses with Pennington’s Wildlife Food Plot Fertilizer (400)

All numbers in parentheses are lbs./acre broadcast
(continued from above)

11. A mixture of Durana Clover (5), red clover (10), rye (30), wheat (30) - in zones C, D, F
12. A mixture of Durana Clover (5) and perennial ryegrass (25) - in zones C, D, F
13. Birdsfoot trefoil (20) - in zones C, D, F

Field management:
Mow deer and turkey food plots for weed control and to produce good seed to soil contact for reseeding annuals.

Dove Field management:
Begin mowing strips in dove fields 2 to 4 weeks prior to opening day. Mow additional strips weekly. Lightly disc previous weeks mowed strips to expose bare ground.

Duck plantings in August:
1. Japanese millet (40) on freshly drained wet mud flats
2. Browntop millet (40) on drier drained mud flats
3. Wingmaster Duck Mix (40)

All numbers in parentheses are lbs./acre broadcast.
## AUGUST CHECKLIST

<table>
<thead>

- **Plant cool season food plots for deer and turkey** (see Aug., Sept. & Oct.)
- **Plant Japanese millet and/or browntop millet** in duck swamps
- **Mow perennial food plots as needed for weed control**
- **Mow, rake, and bale dove fields** (see below for specifics)
- **Prepare soil for fall planting**

### Cool season food plots for deer and turkey:

1. Rackmaster Elite (50)
2. Rackmaster Deluxe Fall Deer Mix (100)
3. Pennington Deer & Wildlife (100)
4. Rackmaster Clover Trio (10)
5. Rackmaster Deer Greens (10)
6. A mixture of Durana Clover (5) and Wintergrazer 70 Rye (60)
7. Pennington-Buckmasters Ultimate (8)
8. Pennington-Buckmasters Feeding Frenzy (50)
9. Rackmaster Refuge (10)
10. Chicory (3)

Soil test: contact local county extension agent for soil test bags and instructions.

### Duck plantings:

1. Wingmaster Duck Mix (40)
2. Wingmaster Wildlife Rice (40)
3. WGF Grain Sorghum (10)
4. Corn (10) on prepared seed bed
5. Grain sorghum (10) on prepared seed bed
6. Japanese Millet (40)

### Turkey plantings:

1. Wingmaster Chufa (40)
2. Wingmaster Wild Turkey Mix (40)

For Zone Map see inside back cover.
Wild Game Plot Planting Tips:
1. Always lime and fertilize, because most woodland soils are low in phosphorus and have a low pH (acidic). A soil test will tell you how much to use. Information on taking soil tests can be obtained from your local County Extension Office.
2. Always prepare the soil by plowing, smoothing and firming the seed bed. Good seed-soil contact is essential for a thick, productive stand.
3. Broadcast seeding by hand or with a spreader can produce good results if you are careful to cover most seed no deeper than 1/4 inch. Use a cultipacker, log or a light drag to firm the soil after planting.
4. Select a site that is long and narrow with curves or bends in it to provide a sense of safety for wildlife. A rule of thumb is 2 to 10 acres of food plot for every 100 acres of habitat.

Wild Game Plot Planting Tips continued in November.
Wild Game Plot Planting Tips:

1. Always lime and fertilize, because most woodland soils are low in phosphorus and have a low pH (acidic). A soil test will tell you how much to use. Information on taking soil tests can be obtained from your local County Extension Office.

### Plant cool season food plots for deer and turkey (see Aug. & Sept.)
- C, A, B

### Fertilize perennial food plots for deer and turkey (if not done in September)
- C

### Fertilize Japanese honeysuckle (if not done in September)
- A, B, C, E

*Fertilize perennial food plots:*
1. For newly planted clover mixes use 300 lbs./acre 
   Pennington Wildlife Food Plot Fertilizer 8-12-12
2. For grasses use Pennington Wildlife Food Plot Fertilizer 8-12-12 (400)
3. Use soil test recommendations if available

*Warm season for quail:*
1. Wingmaster Quail Mix (40)
2. Browntop millet (40)
3. Egyptian wheat (10)
4. Grain sorghum (10)
5. Corn (15)
6. Soybeans (60)
7. Grain sorghum (5), with iron clay peas (40)
8. Iron clay peas (60)
9. Oklahoma Game Bird Peas (40)

*All numbers in parentheses are lbs./acre broadcast*
Cool season food plots for deer and turkey:
1. Rackmaster Elite (50)
2. Rackmaster Deluxe Fall Deer Mixture (100)
3. Pennington Deer & Wildlife (100)
4. Pennington - Buckmasters Ultimate (8)
5. Pennington - Buckmasters Feeding Frenzy (50)
6. A mixture of Durana Clover (5), red clover (10), rye (30), wheat (30) - in zones A, B, C, D, F
7. A mixture of Durana Clover (5) and perennial ryegrass (25) - in zones C, D, F
8. A mixture of crimson clover (15), hairy vetch (15), wheat (60) - in zones A, B
9. A mixture of arrowleaf clover (15) or crimson clover (15), oats or rye (30), wheat (30) - in zones A, B
10. Birdsfoot trefoil (20) - in zones C, D, F
11. Rape (2), kale (2), turnip (2)

All numbers in parentheses are lbs./acre broadcast

For Zone Map see inside back cover.
Use Pennington Wild Bird Feed for a complete mixture of grains for a healthy diet.

**Fertilize:**
Use Pennington’s Wildlife Food Plot Fertilizer (400)
1. Japanese honeysuckle
2. Oak trees
3. Mature fruit trees

**Minerals/Salt:**
Use Rackmaster Deer Mineral

Select a clay soil area near a food plot or other food source. Clear leaf litter and dig a shallow hole. Mix 50 lbs. of mineral/salt mixture with an equal amount of soil. Recharge as needed.

All numbers in parentheses are lbs./acre broadcast.
### MARCH CHECKLIST

- Plant cool season reseeding annual and/or perennial mixtures for deer, turkey and rabbits (see February)
- Plant legumes for quail and songbirds (see February)
- Control burn for deer, turkey and quail
- Fertilize existing food plots and/or existing vines and trees
- Mow bicolor lespedeza for quail
- Put out minerals/salt for deer
